项目：京剧盲盒包装设计

受众：18-30 岁盲盒收藏者、
对中国传统文化感兴趣的人群、
博物馆参观者和游客

目标：打造‘传统与现代融合’
的京剧盲盒包装，突出传统文化
+ 可复用 + 可持续

Progetto: Packaging Design per Surprise Box dell'Opera di Pechino

Pubblico di riferimento

Collezionisti di surprise box di età compresa tra i 18 e i 30 anni

Persone interessate alla cultura tradizionale cinese

Visitatori di musei e turisti

Obiettivo

Creare un packaging per surprise box dell'Opera di Pechino che fonde tradizione e modernità, mettendo in risalto tre elementi chiave: cultura tradizionale, riutilizzabilità e sostenibilità.

经调研发现，当前市面上多数盲盒包装采用纸质材质，形式较为单一。仅满足基本包装功能，在外观精美度上有所欠缺，缺乏能够体现文化内涵与独特创意的设计元素，难以满足消费者对高品质、个性化包装的需求。且因大多盲盒纸质包装缺乏独特设计与附加功能，消费者拆盒后多直接丢弃，造成资源浪费，不利于环保。

Indagini rivelano che la maggior parte dei packaging per scatole misteriose sono di carta, semplici e poco eleganti. Mancano di design creativo e non soddisfano le esigenze dei consumatori.

Inoltre, vengono spesso gettati subito, sprechendo risorse e non sendo ecologici.

Materiali: Plastica/carta
Elementi culturali: Assenti
Riutilizzabilità: Assente

京剧盲盒包装设计-Packaging design per surprise box dell'Opera di Pechino

Iterazione

prompt:Project: Peking Opera Blind Box Packaging Design

Audience: Blind box collectors aged 18-30, people interested in traditional Chinese culture, museum visitors and tourists

Goal: Create Peking Opera blind box packaging with 'integration of tradition and modernity', highlighting traditional culture + reusability + sustainability

Prompt:Generate a 3D-rendered, photorealistic packaging design for a blind box gift box themed around Chinese classical opera masks. The design must highlight the texture of Chinese intangible cultural heritage (ICH) and the collectible nature of blind boxes, balance traditional elements with modern aesthetics, and meet packaging practicality and visual appeal standards. Detailed Design Specifications Overall Style: Blend traditional Chinese aesthetics with modern minimalism; rich but not cluttered colors; 3D rendering to present realistic material textures (e.g., cardboard grain, gold foil luster); suitable for shelf display (refer to the "Mockup e prove a scaffale" principle in the document). Front Design: Take the classical mask of "Sheng" (male role) or "Jing" (painted-face role) in Peking Opera as the visual core, with exquisite mask details (including traditional floral patterns, smooth lines) and traditional Chinese color scheme (bright red, shiny gold, ink black, optional gradient of imperial blue/emerald green); prominently display the product name "Chinese Blind Box" (font in traditional calligraphy style, not exaggerated); place the brand logo in the corner, clear and recognizable without overshadowing the main subject (avoid the "troppi elementi sul fronte" mistake in the document). Side & Back Design: Sides: One side prints a close-up of the mask's local details (e.g., eye patterns) to hint at the content; the other side labels short phrases like "Inspired by ICH" and "Limited Edition Collection"; Back: Neatly arrange practical information—magnetic closure instructions ("Magnetic Easy-Open"), recyclable material label ("Eco-Friendly Special Cardboard + Lamination"), brief introduction to Chinese opera mask culture (e.g., "Derived from traditional Peking Opera masks, carrying Chinese opera culture"), with clear icons (opening icon, cultural symbol icon) and appropriately sized text (avoid the "testi microscopici" mistake in the document). Structure & Material: Rigid gift box

prompt:3D photorealistic blind box packaging design (Chinese classical opera mask theme): Blend Chinese traditional aesthetics + modern minimalism; show realistic textures (cardboard grain, gold foil luster); front: Peking Opera "Sheng/Jing" mask as core (traditional patterns, red/gold/black color scheme), "Chinese Blind Box" in traditional calligraphy, corner brand logo; sides: 1 side mask detail close-up, 1 side "Inspired by ICH" + "Limited Edition"; back: magnetic closure instruction, recyclable material label, brief opera mask intro (with icons, readable text); rigid box + magnetic structure, recyclable cardboard; 2-3 color variants (red/black/gold base); add huiwen/cloud motifs (not cluttered), local gold foil; balance negative space, fit shelf display.

京剧盲盒包装设计-Packaging design per surprise box dell'Opera di Pechino

Prompt:Generate Peking Opera Jing role facial makeup figurines for blind box gift sets, 10-12cm in height (to fit the gift box size), combining collector-level details with the cultural characteristics of facial makeup, with vivid shapes that echo the classical opera theme of the gift box. Appearance details: The figurines adopt the facial makeup style of Peking Opera Jing roles (such as classic characters like Bao Zheng, Dian Wei, etc.). The facial features strictly follow traditional facial makeup patterns — symmetric cloud patterns / spiral patterns are painted on the forehead, the eyebrows are sharp "knife-shaped eyebrows", the area around the nose is decorated with "butterfly makeup" or "bat-shaped makeup". The colors use the iconic color schemes of Jing roles (for example, Bao Zheng style: the entire face is dark black + a crescent-shaped white pattern on the forehead; Dian Wei style: the entire face is deep yellow + red flame patterns between the eyebrows). The color edges are clear

Complete blind box packaging design (integrates red Peking Opera makeup sample + 5 character side samples):
Overall style: Red matte velvet material (matches sample); unified red/gold/black high-saturation color scheme, flat opera decorative style.
Front: Retain red velvet texture, large Peking Opera Jing role facial makeup (red background + gold patterns, same line style as sample), golden calligraphic "Jing Chinese Blind Box", upper-right decorative pattern icon.
Side (same proportion as sample side): 5 character samples arranged vertically at equal distances (1/5 side width each); each with thin golden outer frame (same as sample), background merged with side red color; replicates figurine core features (e.g., Jing · Bao Zheng: black face + crescent, Dan · Imperial Concubine: pink face + plum blossom); small golden calligraphy annotations below each (centered, e.g., "Jing · Bao Zheng").
Details: Side golden lines/texture (matte velvet + gold stamping) 100% consistent with front; no sample overlap, coherent front-side vision.

Logica di iterazione: Ottimizzare la disposizione delle informazioni, evitare "troppi elementi sul fronte" e unificare i colori.

京剧盲盒包装设计-Packaging design per surprise box dell'Opera di Pechino

Struttura: Scatola rigida + chiusura a magneti

Divisorio in cartone ondulato all'interno della scatola

Materiali: 80% cartone riciclato, stampa a foglia d'oro locale, texture di velluto rosso sul fronte
